

14 April 2008

Participation in Exhibitions at the APPEA 2008 Conference and Exhibition

We participated in the exhibitions of the annual conference of 2008 held by the Australian Petroleum Production and Exploration Association in Perth in the Commonwealth of Australia from April 6th to 9th, 2008.

We are participating in many Australian petroleum and natural gas projects and implementing preparatory work for the development of LNG (liquefied natural gas) projects in Western Australia's Ichthys giant gas-condensate field through our subsidiary INPEX Browse, Ltd. as an operator.

There are at least 2,200 participants at the APPEA annual conference and we set up an exhibition booth with related departments of our group (Head Office : Tokyo) with the Perth Office of INPEX Browse, Ltd. as the center. We gave explanations to many visitors on our group and our group's businesses.
